STREET REPAIR 2025

The City of Lemon Grove is taking significant steps toward revitalizing its streets and enhancing the overall quality of life for residents, businesses, and visitors. In November 2024, the City Council approved a contract for the largest Street Rehabilitation Project in the history of the City.

The scope of work involves a comprehensive list of streets designated for resurfacing, pavement repair, overlay treatments, slurry/crack seal treatments, installing ADA-compliant curbing, incorporating stormwater pollution prevention measures, and traffic striping throughout Lemon Grove.

The project will cover 75 street segments, with a focus on approximately 25 streets with a Pavement Condition Index (PCI) of 25 or below, as identified by the City Council during the January 16, 2024, Council Meeting. With a budget of \$4.9 million, these streets will receive priority attention in this rehabilitation effort.

Construction is scheduled to begin early February and is expected to last 3 months. During street repairs, it's important for all residents to follow traffic safety guidelines. Newly paved roads require time to set and cure. Avoid driving on freshly paved surfaces until the area is clearly marked as safe to use. Please be mindful of detours, road signs, and traffic control measures to ensure your safety and the safety of construction crews.

The City of Lemon Grove is committed to building a brighter future for our community, and the upcoming Street Rehabilitation Project is a key step in that direction. This transformative project is one of many ways we're working together to strengthen our community and pave the way for a better tomorrow in an effort to build a stronger Lemon Grove.
